Survey results presented on this report have been condensed for reference. Results are updated periodically to ensure accuracy and therefore historically published results are subject to change.

Notes:
 Central includes Downtown and Midtown, while Suburban includes Central North, Central East, GTA North, GTA East and GTA West.

¹ Office Inventory: For the purpose of this report, buildings with less than 20,000 SF of office space and buildings owned and occupied by the government have not been included in the office inventory
² Vacancy Rate: The Vacancy Rate is the amount of vacant space divided by the existing building inventory. Vacant space is physically unoccupied, and it includes both headline and sublease space.
³ Proportion of Sublease Availability: This ratio represents the share of available sublease space of the total available space.
⁴ Availability Rate: The Availability Rate is the amount of available space divided by the building inventory base. Available space is space that is available for lease and can be occupied, vacant or unknown.
⁵ Absorption: Absorption is the difference in occupied space from quarter to quarter or year-over-year.
⁶ Average Rental Rates: Average rental rates are calculated from available spaces, which also quote rental figures.
⁷ Currently Under Construction: Total square feet for currently under construction includes all buildings, even where building class is un-listed.

Notes:

- ¹ Office Inventory: For the purpose of this report, buildings with less than 20,000 SF of office space and buildings owned and occupied by the government have not been included in the office inventory
- ² Vacancy Rate: The Vacancy Rate is the amount of vacant space divided by the existing building inventory. Vacant space is physically unoccupied, and it includes both headlease and sublease space.
- ³ Proportion of Sublease Availability: This ratio represents the share of available sublease space of the total available space.
- ⁴ Availability Rate: The Availability Rate is the amount of available space divided by the building inventory base. Available space is space that is available for lease and can be occupied, vacant or unknown.
- ⁵ Absorption: Absorption is the difference in occupied space from quarter to quarter or year-over-year.
- ⁶ Average Rental Rates: Average rental rates are calculated from available spaces, which also quote rental figures.
- ⁷ Currently Under Construction: Total square feet for currently under construction includes all buildings, even where building class is un-listed.

Survey results presented on this report have been condensed for reference. Results are updated periodically to ensure accuracy and therefore historically published results are subject to change.

Notes:

- ¹ Office Inventory: For the purpose of this report, buildings with less than 20,000 SF of office space and buildings owned and occupied by the government have not been included in the office inventory
- ² Vacancy Rate: The Vacancy Rate is the amount of vacant space divided by the existing building inventory. Vacant space is physically unoccupied, and it includes both headlease and sublease space.
- ³ Proportion of Sublease Availability: This ratio represents the share of available sublease space of the total available space.
- ⁴ Availability Rate: The Availability Rate is the amount of available space divided by the building inventory base. Available space is space that is available for lease and can be occupied, vacant or unknown.
- ⁵ Absorption: Absorption is the difference in occupied space from quarter to quarter or year-over-year.
- ⁶ Average Rental Rates: Average rental rates are calculated from available spaces, which also quote rental figures.
- ⁷ Currently Under Construction: Total square feet for currently under construction includes all buildings, even where building class is un-listed.
